on behalf of the EBF

EBF 7th Open Symposium
19-21 November 2014

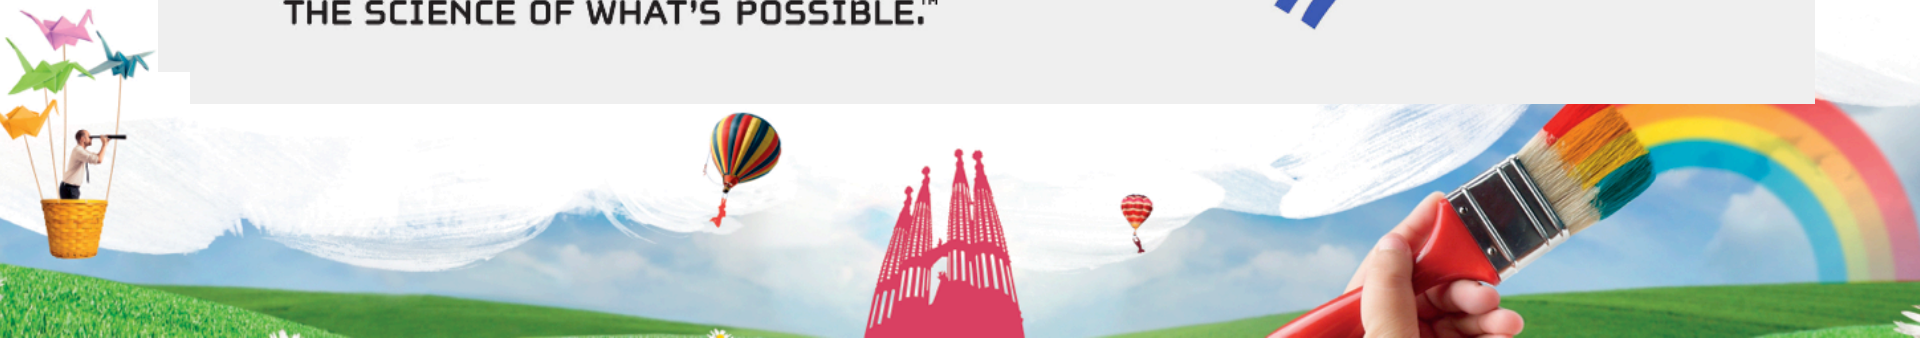

Bioanalysis

Young investigator
AWARD 2014

Waters

THE SCIENCE OF WHAT'S POSSIBLE.™

Every year *Bioanalysis* recognizes some of the brightest young scientists in the field in its Young Investigator Award. 15 young scientists have been nominated in 2014 by their supervisors for a chance to win the 2014 Award.

The 2014 Award was again supported by Waters Corporation. Paul Rainville, Senior Manager Scientific Operations PLS at Waters, believes that supporting up-and-coming researchers is key,

“The fundamental reason we support the Young Investigator Award is that we are investing in the future of bioanalysis.”

The winner will receive a \$1000 prize, a subscription to *Bioanalysis*, and the opportunity to share their research at the EBF Open Symposium in Barcelona. EBF Committee member Peter van Amsterdam commented,

“The EBF is committed to help talented young scientists develop and to provide an opportunity for them to actively participate in and contribute to international bioanalytical discussion. In line with this commitment, the EBF has again reserved time to celebrate the winner of the 2014 Bioanalysis Young Investigator Award at the upcoming 7th EBF Open Symposium (Barcelona, 19–21 November 2014)!”

The 2014 Nominees

Adam Shuhendler, Stanford University, CA, USA

Andrew M Glowacki, inVentiv Health Clinical, NJ, USA

Andrew Mayer, GlaxoSmithKline, PA, USA

Anna Koptina, Uppsala University, Sweden

Casey Burton, Missouri University of Science and Technology, MO, USA

Cristina Guallar Hoyas, Imperial College, UK

Erika Pfaunmiller, University of Nebraska-Lincoln, NE, USA

Joe M El-Khoury, Cleveland Clinic, OH, USA

Laura M Cole, Sheffield Hallam University, UK

Laurence Mayrand-Provencher, Algorithmme Pharma Inc., Canada

Monika J Bak, Copenhagen University, Denmark

Peter Nemes, The George Washington University, NW, USA

Valentina Pirro, Università degli Studi di Torino, Italy

XiuJun (James) Li, University of Texas at El Paso, TX, USA

Xue Li Guan, Swiss Tropical and Public Health Institute, Switzerland

The 2014 Winner

2014 Bioanalysis Young
Investigator Award Finalist:

XiuJun (James) Li
